

NH Broadband Mapping & Planning Program: Maximum Advertised Download Speed

Broadband Availability

Maximum Advertised Downstream Speed

Other Features

The map displays broadband access information submitted to the NH Broadband Mapping & Planning Program (NHBMPP) as of September 30, 2014.

Service providers submitted data in a range of geographies, including addresses, road segments, census blocks, census tracts, etc. For mapping purposes, all data are aggregated and displayed at the census block level. A census block is mapped as "served" if service is delivered to any part of the block.

Broadband is defined as access that is at least **768 kbps downstream** and **200 kbps upstream**.

Maximum download speed was calculated without satellite broadband service.
